

# OIL RICH LEG UP

## COLD PRESSED SUNFLOWER MEAL

### Protein & Fat for Maintaining Condition

Leg Up Sunflower Meal is derived from New Zealand grown high oleic sunflower seed. A cold pressing process is used to extract the oil from seed without the use of heat or chemicals. This gentle process ensures all nutritional benefits are retained (protein and oil) in the meal and are available for your horse to utilise.

Leg Up Sunflower Meal is not a complete feed and therefore should be applied into a balanced diet.

### Key Benefits:

- Quality fat & protein for building and maintaining body condition
- Low in starch and sugar providing a cool source of energy
- Higher fat levels for coat shine and healthy skin

### For Best Results:

- Feed in conjunction with forage (pasture, hay and/or chaff)
- Feed in conjunction with Leg Up Performance Oil for optimal coat shine and joint health
- Adjust the following feeding rates depending upon condition and level of work

### Feed Rates:

Introduce the feed slowly over a period 2 weeks, leading up to the below specified rates.

Weight range of horse	Maintaining body condition	Improving body condition
300-400kg	300g	600g
400-500kg	400g	800g
500-600kg	500g	1kg

### Nutrition Information:

Major Nutrients	per 1kg
Digestible Energy	13.2 DE
Crude Protein	26%
Crude Fat	14%
Crude Fibre	31%
Moisture	7%
Starch	1%
Soluble Sugar	5%
NSC	16.5%
Vitamin E	48.0mg
