Pure Oil
NEW ZEALAND LTD

Full Fat Canola Meal

High Energy Stockfeed Ingredient

Full Fat Canola Meal is the nutrient rich co product remaining after cold pressing rapeseed to produce oil. Unlike conventional canola meals, much higher levels of natural oil remain in the meal, creating a high energy feed ingredient containing around 40% oil and 24% protein.

Why Use Full Fat Meal?

- 40% oil providing very high digestible energy
- 24% crude protein to support growth and production
- Highly palatable and digestible feed ingredient
- Natural Vitamin E and beneficial fatty acids
- Lower inclusion rates due to high energy density

Applications

Beef Cattle

- Supports efficient weight gain and finishing.

Dairy

- Provides additional energy and protein to support milk production and body condition.

Calf Rearing

- Highly digestible energy and protein to support early growth and rumen development.

Equine

- A natural cool energy source supporting condition and topline

How It Is Produced

Full Fat Meal is produced as a co product of our cold pressed rapeseed oil production. Rapeseed sourced in partnership with New Zealand arable farms is mechanically pressed without heat or chemical extraction, with the meal supplied fresh year round to retain the natural oils, proteins and nutrients of the seed.

Available in 20kg bag, full pallet, 1000kg bulk bag and bulk deliveries.

Nutrient	Unit	Measure
Dry Matter	%	95
Crude Protein	%	24
